Harlan J. Berk, Ltd. has presented an innovation in antiquities and numismatics for some time now. The system is simple. When you want an antiquity or coin in the sale, just bid the estimated price by phone or mail. We will send you the antiquity or coin immediately. No waiting for the closing of the sale. Any and all antiquities or coins not sold before the closing date will be sent to the highest bidder on May 14, 2003.

**EXAMPLE**—You bid estimate on an item valued at \$100.00 and if your bid is the 1st to reach us, you will receive the item immediately. If on the other hand, you bid \$75.00 on the same item and are still the high bidder at the end of the sale, the item will be mailed to you on the closing date, May 14, 2003.

If you are ever in the area, stop in to see us! Of course, it's best to call first. **Harlan J. Berk, Ltd. reserves the right to refuse any ridiculous bids.**

Archaic head of Ares. Beautiful helmet detail. Very nice hair and eye, but nose and chin are off the flan. EF ..... 900

5. **JULIUS CAESAR STRUCK BY L. MUNATIUS PLANCUS**; Aureus. 45 BC, 8.03g., Cr-475/1a. Obv: Bust of Victory r., draped; behind, C CAES upwards; before, DIC TER downwards. Rx: Pitcher. VF ..... 3650

7. **CLAUDIUS**; 41-54 AD, Aureus, Rome, 41-2 AD, 7.86g., C-34 (45 Fr.), BM-16, RIC-15. Rx: Oak wreath awarded to Claudius "By decree of the Senate for saving the lives of his fellow-citizens". First year of reign, on obverse Claudius wears wreath of oak rather than laurel, as on all aurei and denarii of this year only. The portrait of Claudius on this coin is of the very finest style. Near MS ..... 7850
8. **VESPASIAN**; 69-79 AD, Aureus, mule with Titus reverse die, Rome, 76 AD, 7.22g., BM-132 (pl. 3.20, same dies, misdated to 74 AD), C-107 corr. (Caylus, 45 Fr.), RIC-71 var. Obv: IMP CAESAR VESPASIANVS AVG Head laureate l. Rx: COS V Heifer standing r. "The heifer is unquestionably the famous statue of Myron which had been placed by Augustus in the 'Porticus Apollonis' and was transferred by Vespasian to the temple of Peace" (BMC, p. xxxviii). BMC and RIC erroneously date this coin to 74 AD, not realizing that it is in fact a mule of 76 AD struck from a COS V reverse die of Titus instead of a proper COS VII die of Vespasian. This proved by the use of the same obverse and reverse dies in correct combinations on other coins: the evidence is given in the note to Lot 23 in our catalog 127. Our aureus is thus very rare and of considerable specialist interest: mint mules of the early and middle Roman empire, rare enough in bronze and silver, almost never occur in gold. Old ding on obverse, otherwise good VF ..... 4500
9. **HADRIAN**; 117-138 AD, Aureus, Rome, c. 132 AD, 7.09g., BM-844 note, Strack-303 (Gotha only with this bust type), C-828 (50 Fr.) var. Obv: HADRIANVS AVG COS III P P Bust draped l., head bare. Rx: HISPANIA Hispania reclining l. holding branch, rabbit by her feet. From the same reverse die as BM-844 pl. 63.11. Obverse cleaned, EF ..... 4500
10. **HADRIAN**; 117-138 AD, Aureus, Rome, c. 132 AD, 7.18g., BM-866 pl. 64.1 (same dies), Strack-310 pl. VI (Brussels: same dies), C-1498 (60 Fr.). Rx: No legend, Nilus reclining r. holding reed and cornucopia, crocodile in waves below, hippo and reeds before. Part of Hadrian's travel series, commemorating his visit to Egypt in 130 AD, during which his companion Antinous drowned in the Nile. Fine ..... 3500
11. **DIVA FAUSTINA I**; Died 141 AD, Aureus, Rome, 7.20g., BM-383 pl. 9.6 (same dies), C-64 (Paris, 100 Fr.), Strack-443 pl. VI (Vienna spec., same dies as ours), RIC-354 (Rare). Obv: DIVA FAUSTINA Bust draped r. Rx: AETERNITAS Six-columned temple of Diva Faustina, her seated statue veiled and holding scepter within, two statues on bases before outermost columns, on corners of pediment two statues of Victories holding shields above their heads and at its apex a facing quadriga, pediment relief of one upright figure between two other smaller upright objects or figures and two reclining objects or figures, the temple rests on a podium and is accessed by steps that extend across the full width of the podium in front, before the temple one sees the top of an altar and a trellis-work fence that encloses the forecourt. This same temple appears on denarii with the explicit legend AED DIV FAUSTINAE, "The shrine of Deified Faustina". The façade of the temple, with dedicatory inscriptions both to Diva Faustina and (added later) to Divus Antoninus Pius, still exists today in the Roman Forum, built into the church of S. Lorenzo in Miranda; remains of the altar before the temple also survive (Strack, p. 93). Very rare as an aureus; only a handful of specimens survive, all apparently struck from a single reverse die. Strack lists four specimens, BM, Paris, Vienna, and Rome, and the two of these of which we have illustrations are both from the same dies as ours. Two further specimens that we find illustrated in auction catalogues are from the same reverse die as our coin but a different obverse die: Canessa 1923 Caruso 352 = Rollin & Feuardent 1895 Montagu 360 and M&MAG 73 (1988) 240. Except for a minor tick at two o'clock the coin is FDC ..... 14500
12. **CLODIUS ALBINUS AS CAESAR**; 193-195 AD, Aureus, Rome, 194 AD, 7.19g., BMC p. 38 note, obv. legend var. of C-70 (1800 F.), RIC-9b (R4). Obv: D CLOD SEPT ALBIN CAES Head bare r., folds of cloak on both shoulders. Rx: SAECVLO FRVGIFERO COS II Radiate African god standing l. holding caduceus between two wheat ears and trident. Repaired: two holes that were punched through the coin in ancient times at the top of the obverse (= the bottom of the reverse) have been expertly refilled. Extremely rare: only the third aureus of this exact type, and the fifteenth aureus of Albinus as Caesar altogether, that are known to C. Clay. The two others of this exact type are Ciani May 1955 366 and Sotheby July 1996 133 = Christie Oct. 1984 96 = Ars Classica XVIII 1938 [de Sartiges] 307. A further two specimens are recorded with the same reverse type but with CL rather than CLOD in the obverse legend: Vienna and Leu April 1978 340. Our coin shares its obverse die with the two cited specimens of the same type, but brings a new third reverse die for the type after the two that had previously been known. The same obverse die was also used for the type FORT REDVCI COS II, e.g. BM-93 pl. 8.4. Pleasant portrait. One of the important rarities of the Roman series. Two repaired holes at 12:00 on obverse which are not visible to the naked eye, otherwise about VF ..... 17500

13. **SEPTIMIUS SEVERUS**; 193-211 AD, Aureus, Rome, 207 AD, 7.19g., BM-528, C-486 (Paris, 200 Fr.), RIC-206 (R2). Obv: SEVERVS PIVS AVG Head laureate r. Rx: P M TR P XV COS III P P Draped bust of Minerva r. with facial features of Caracalla and long hair reaching shoulders behind neck, wearing earring, necklace, and crested helmet. Very rare. That the head on reverse deliberately represents Caracalla as Minerva (or Roma) is suggested by the corresponding denarius that replaces the imperial titles on the reverse with the legend RESTITVTORES VRBIS, "Restorers of the City". The plural legend implies that both Severus and Caracalla are depicted on the coin, therefore that the bust of Minerva is intended to represent Caracalla, whose features she indeed bears! For an illustration of this denarius see Seaby's Roman Silver Coins III, p. 42, 597. Slight flatness from striking at the highest point of the reverse, otherwise virtually Mint State ..... 9500
14. **PLAUTILLA, WIFE OF CARACALLA**; Aureus, Rome, 203-4 AD, 7.03g., BM-422 note, C-15 (formerly Paris, 700 Fr.), RIC-367 (R3). Obv: PLAVTILLA AVGVSTA Bust draped r. Rx: PIETAS AVGG Pietas standing r. holding scepter and child. Very rare: only the seventh aureus with this reverse type known to C. Clay. Of the six previously known, two are in museums (Paris and Berlin) and four have appeared in auction catalogues. Our coin is from the same dies as one of the auction coins, Hess 194 1929 Vogel 901 = J. Hirsch 24 1909 Consul Weber 1912. Pleasant VF ..... 14500
15. **CONSTANTINE I**; 307-337 AD, Solidus, Thessalonica, 324 AD, 4.51g., RIC-131, C-102 (100 Fr.). Obv: No legend, diademed head of Constantine r. gazing upwards. 16. **MAGNENTIUS**; 350-353 AD, Solidus, Trier, 351 AD, 4.26g., RIC-276 var., Bastien Magnence-46, C-48 (35 Fr.). Obv: D N MAGNENTIVS P F AVG Bust draped and cuirassed r., seen from front, head bare. Rx: VICTORIA/AVG LIB/ROMANOR Viictory and Libertas holding between them a trophy on a hooked staff, mintmark TR in exergue. According to RIC, the shaft of the trophy should have a line through it, not a hook, with this obverse legend. RIC 253-4 records the hooked staff only with an earlier obverse legend, IM CAE MAGNENTIVS AVG. Old scratch at 4 o'clock in right obverse field. Nearly EF ..... 4500

36. **IRENE, SOLE REIGN**; 797-802 AD, Solidus, Syracuse, 19 August 797-31 Oct 802 AD, 3.88g., Cf. DO-1c, (Constantinople) Obv: Facing crowned bust of Irene holding globus cruciger and cruciform scepter, pellet in field l. Rx: Same type as obv., but C in field l., I in r. The "CI" first used in the reign of Leo III DO-47 is the shift from Latin to Greek with "CI" replacing "SCL". "CI" is not used on the other three soldii of Irene from Syracuse. This is the first instance where the C and I appear on the same side of the coin. This type certainly could have been anticipated as it is parallel to the types of Irene's sole reign coinage of Constantinople but it had not appeared until now. The three other known sole reign soldii of Irene struck at Syracuse are of two different types. An important rarity. Only one recorded. Mint State ..... 24500
37. **MICHAEL II**; 820-824 AD, Solidus, 4.46g., BN 1-6, Berk-241. Some flatness and numerous contact marks. VF ..... 450
38. **THEOPHILUS AND CONSTANTINE (HIS SON)**; 829-842 AD, Semissis, Syracuse, 5 June 830-831 AD, 1.75g., DO-22, BN-5, Sear-1672 (referring to DO and BN specimens), Hunt-, Tolstoi-, Ratto-. Obv: Portrait of Theophilus. Rx: Portrait of child Constantine. Extremely rare: only three recorded specimens. This issue which portrays Constantine the Infant, son of Theophilus, is the rarest portrait of the Byzantine series. Its rarity has been obscured by a misleading footnote in DO. The fact is that until the 1960s neither DO nor the BN owned an example of this issue and the specimens they then acquired both came from the same hoard which otherwise only contained coins of Theophilus of Syracuse. About EF/MS ..... 16500
39. **BASIL I**; 867-886 AD, Solidus, Constantinople, New Year's, 868 AD, 4.48g., S-1702, DO-1. Less than six recorded. Ex Hunt 1990 #677 \$39,600, ex Sotheby 1998 #468 \$23,100. This coin was issued for the New Year's Day festivities of 868 AD. The obverse type is highly unusual for the series and only five coins are recorded for this type of which this is the finest. One reason for this issue's rarity is the relative poverty in which Basil found himself after Michael III's death. The treasury contained only 300 pounds of gold, collected by melting down the gold ornaments of Theophilus' throne room in the palace, and nine sacks of miliaresia. An important and highly desirable rarity. Mint State ..... 29500
40. **BASIL I**; 867-886 AD, Solidus, Constantinople, 882 AD, 4.37g., S-1703, Berk-268 (this coin). Obv: Basil I wearing loros, holding globe with patriarchal cross and akakia. Rx: Constantine and Eudocia. Ex Sotheby 1998 #472 \$20,350. This is an unusual issue in that it portrays the empress Eudocia. If the date of 882 AD is correct this is a memorial issue struck at the time of her death. Extremely rare and beautifully struck, EF+/About EF ..... 24000

Zacynthus is an important island in the Ionian Sea, about ten miles off the coast of Elis. Homer mentions it frequently. Its one city bore the same name as the island. The present archaic coin was discussed in Numismatic Chronicle, 1885, where it was described as "apparently unique." We know of no examples beyond that

- coin, the Rosen specimen, and the coin offered here. Extremely rare; possibly the third known specimen. All Greek island coins are rare. In that this coin bears a tripod which is usually the symbol of the games and as the island of Zycanthus is off the coast of Elis, it is certainly possible that this coin was issued in conjunction with the Olympic Games, though admittedly this theory is absolutely unproven. Perhaps it was slightly shortened from the first obverse legend of Titus' reign, IMP T CAESAR VESPASIANVS AVG, BM-1. Rx: LAETITIA TEMPORVM The spina of the Circus Maximus decorated as a ship facing l., with the turning posts at its prow and stern, a sail mounted on the central obelisk, and the spina's other monuments visible in between; above the ship, four quadrigas racing l.; below, seven animals: an ostrich at l. and bear at r.; between them a lion and a lioness chasing a wild ass and a panther running towards a bison. Rare: only three specimens in Reka Devnia hoard. This famous type commemorates the chariot races and animal hunt that took place on the seventh and final day of Severus' Saecular Games in 204 AD, as described in the inscriptional acts of those games which were found in Rome in the 1870s and 1930s, and also in the text of Dio Cassius, tacked on to his description of Severus' Decennial Games of 202 AD by his Byzantine epitomator as we can now see. The games consisted of chariot races, indicated by the racing quadrigas in the the coin type, and then a hunt of 700 beasts, 100 each of "lions, lionesses, panthers, bears, bisons, wild asses, ostriches", which were released in large groups from a receptacle shaped like a boat. As C. Clay was the first to observe, the seven kinds of animals named by both Dio and the inscriptional acts are also depicted in the coin type: on good specimens, especially the aureus BMC pl. 34.4, the ostrich and the bear are clear, the lion has a mane, the ass has long ears, the bison has horns and a hump. Two large felines remain, of which we may suppose that the one accompanying the lion is the lioness and the one attacking the bison is the panther. On our denarius as on that in the BM (pl. 35.19), however, the panther attacking the bison has been omitted and, instead, the ass running from the lion and lioness and looking back at them has been given a second head with antelope-like horns, as though to represent two animals overlapping each other. Rx: GLORIA EXERCITVS Emperor standing l., head r., holding spear with point downwards and shield resting on ground; mintmark CONS in exergue, officina letter in l. field. This coin belongs to a rare and highly innovative issue of bronze coins with four new reverse types that appeared only at the new imperial mint at Constantinople, c. 327-8 AD. For the first time on the bronze coins, Constantine is given the title Maximus, "the Great", and wears a broad-banded diadem instead of the traditional laurel wreath. The reverse legend GLORIA EXERCITVS of our coin, perhaps referring to Constantine's victory over Licinius I, is new to the coinage and presages the well-known "Two Soldiers" type with the same legend, which was to become the predominant type of the bronze coinage at all mints from c. 330 to 340. The mintmark CONS shows that Constantinople, though still under construction and not to be dedicated until 330, already bore its new name by c. 327. The other three new reverse types of the same issue were GLORIA ROMANORVM Roma seated, LIBERTAS PVBLICA Libertas holding up two wreaths in galley, and SPES PVBLIC Labarum inscribed Chi-Rho piercing serpent. Her reappearance on the coinage with reverse Public Peace in 337-340 should be connected to the succession of her three grandchildren Constantine II, Constantius II, and Constans in 337, after the assassination of Dalmatius, Hannibalianus, and other descendants of Constantine I's stepmother Theodora who were regarded as their potential rivals. Rx: Artemis advancing r. holding bow and drawing arrow from quiver. Jurukova, Muenzpraegung von Bizye, no. 10 (two specimens), knows only an Ares type for Sabina at this mint, in a larger denomination and with Sabina's typical "hair up" coiffure not the "Julia Titi" version on our coin. Rx: CGIHP She-wolf standing r., head l., suckling Romulus and Remus. Rare. We found coins of Elagabalus at this mint recorded only by Cohen, not in many other standard catalogues such as BMC, Von Aulock, Lindgren. The attribution to Elagabalus rather than Caracalla depends on the combination of the PIVS FEL obverse legend with an unbearded portrait, which never occurs for Caracalla on Roman coins (his coins with that obverse legend show a bearded portrait), but is normal on Eastern denarii of Elagabalus. Obv: IMP CAES L SEP SEV ALEXANDER (the letter S written backwards all three times) Bust laureate cuirassed r. seen from front, Medusa head on breast. Rx: DEO AE[SC SVB] CGHIP Bull standing l. placing r. front leg in lap of Aesculapius seated r. The same reverse type occurs at Parium under Commodus and Otacilia Severa, BM-104 and 114 (pl. XXII.16), SNG Aulock-1337, but it may be unknown for Severus Alexander. Not in Berk photofile or the ten to twelve standard works consulted. It is probably the only ancient coin type that refers to veterinary medicine: the distinguished French numismatist Belley, cited in BMC p. 105, suggested 250 years ago that the SVB in its legend should be expanded to "subvenienti", giving the sense "To Aesculapius, the god who helps", as though he had cured a bull with an injured leg or some other complaint! The obverse of our coin is interesting for its elaborate bust type, the three backward esses in the legend, and for wrongly giving Alexander the names Lucius Septimius instead of Marcus Aurelius! Rare: Franke-Nolle record 19 specimens of this coin, all from the same obverse die and six reverse dies (since their dies B and 22 seem in fact to be the same as A and 19). The letters in the wreaths on reverse seem to stand for "Pythian" and "Olympic" sc. 876. **EGYPTIAN OPENWORK FAIENCE PLAQUE WITH GOD SEPA OFFERING SCENE**, ca. 1069-525 B.C., 3rd Intermediate to Saite Period Offering scene is depicted, featuring a kneeling human figure with outstretched arms bearing aquatic papyrus plants and a tray of offering, including 'hes' jars containing libations, a single stalk of a marsh plant, and the 'was' sign or dominion. Under the tray, two ankh signs for life encircle the figures arm, along with another 'was' sign. Three corners of the plaque feature additional symbols: behind the figure is the nefer sign meaning that which is good or beautiful; opposite the kneeling figure, in the lower corner, is a serpent wearing a solar disk, symbolic of royal power and magical protection; in the upper corner are the signs 'Neter' meaning God, and 'Nefer' meaning good, forming the epithet of Egyptian kings, the Good God. The figure itself wearing a long wig and broad collar may be identified by its headdress, which features two tall plumes and two solar disks. Under this is depicted a creature with a continuous body that forms segmented

registers with curl-like relief details, and pincer-like projections at the head area. Although the scorpion may be considered, it is more likely a representation of a segmented arthropod, a millipede. This creature is the symbol of the God Sepa, worshipped in the area of the city of Heliopolis and invoked in religious literature to protect against snakebites and scorpion stings. In this context this figure would represent offerings made to the king on behalf of the locality where the God Sepa was worshipped. However, in a larger context, this creature with its 42 legs became associated in an allegorical sense with the 42 provinces or nomes within the entire country. In this way, this figural depiction would represent Egypt itself, offering its wealth on behalf of the king. Offering scenes of this type are to be found in Egyptian temples and this plaque may have been a decorative feature on the walls of a temple or royal palace H. 1 3/8" W. 1" ..... 3500

877. **EGYPTIAN VERY LARGE MUMMY MASK**, ca. 664-525 B.C., Saite Period, 26th Dynasty An Egyptian gesso-painted funerary mask with black and red pigments over the gesso foundation. Its wig is covered with painted linen and its beard is fully intact. It has peg holes for insertion onto large sarcophagus. Mummy masks in this large size are extremely difficult to come by. Mounted on a red velvet base for hanging H. 17 3/4" W. 11" ..... 3500

878. **EGYPTIAN AMMUT (DEVOURER OF THE DEAD)**, ca. 664-330 B.C., Late Period Limestone relief fragment with the complete head of Ammut in sunken relief. Ammut dwelt in the netherworld. CERAMICS

892. **ETRUSCAN BUCCHERO HYDRIA**, ca. 6th cent. B.C. From the workshops at Chiusi, Italy, where bucchero pesante reached the zenith of its development. Bucchero, a ceramic made of black volcanic clay is normally molded with motif, fired, then polished. The body of this vase depicts a figural frieze in relief which includes scenes of youths carrying sacrificial lambs on their shoulders, the scenes alternate, with interfacing motifs of profiled, orientalizing sphinxes. The upper portion of the hydria is embellished with four orientalizing masks. One of these masks merges with the rear vertical handle which displays a relief of a full standing archaic styled figure. Two side handles mark the broadest section of the vessel's body, and direct the eye toward the highly elaborate, and spectacular lid. The lid depicts a figural frieze in relief of four striding lions, each separated by a pendant like motif. At the top of the lid is a detachable rooster. Secured by a peg, it fits a central hole in the lid. While vases from Chiusi were known to emulate the works of the Orientalizing Period, they also incorporated the influences of early Etruscan folk art. The fantastic additions of figural friezes in relief were among the more distinctive enhancements of style originating from Chiusi.
